Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 05 February 2001.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-6 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Drawings

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. Applicant is required to describe drawings within the specification, further showing amendments made to the specification. No new matter may be introduced in the required drawing.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Regarding claim 1, line 3 and lines 8-9, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Douceur et al. (U.S. Patent No. 6, 021, 203). As per claim 1, Douceur et al. discloses a method of securing communication where messages are passed between communicating parties encrypted with a one-time pad, for example by combining bits of a message and bits of the one-time pad using a logical XOR operation through one channel or a group of channels in Column 1, lines 23-65, the one-time pad is exchanged between communicating parties through another channel or a group of channels in an encrypted form with the use of private key encryption, for example DES in Column 3, lines 15-37. As per claim 2, Douceur et al. discloses a method of securing communication where the one-time pad is generated and passed between communicating parties concurrently with the rest of an application, which uses this secure communication in Column 3, lines 15-67, Column 4, lines 1-5.

As per claim 3, Douceur et al. discloses a method of securing communication where the one-time pad is entirely generating one communicating party and used by other communicating parties, and possibly by this one also in Column 3, lines 38-60.

As per claim 4, Douceur et al. discloses a method of securing communication where the one-time pad consists of two or more parts, each part is generated by a different communicating party and parts are exchanged between communicating parties in an encrypted form in Column 3, lines 61-67, Column 4, lines 1-13.

As per claim 5, Douceur et al. discloses a method of securing communication where a part of one-time pad is broken into a sequence of pieces and passed between communicating parties in pieces in Column 4, lines 14-34.

As per claim 6, Douceur et al. discloses a method of securing communication where the additional pieces of one-time pad are generated and passed between communicating parties as needed in Column 6, lines 1-39.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shefi (U.S. Patent No. 6,445,794) discloses a system and method for synchronizing one-time pad encryption keys for secure communication and access control.
